

New Zealand After-Sales Service QSFP28 Optical Module SFP

Article Overview

QSFP28 and SFP optical modules in New Zealand are supported through vendor after-sales services including technical support, repair, replacement, and software maintenance.

Overview of QSFP28 Modules

QSFP28 (Quad Small Form-factor Pluggable 28) modules are 100GbE transceivers that use four lanes of 25G electrical signals to deliver up to 100 Gbps data rates. Each lane can operate at up to 28 Gbps, providing overhead for error correction and clocking. QSFP28 modules are hot-pluggable and compatible with various optical technologies, including multimode VCSELs, single-mode DFB lasers, and PAM4 optics. They can also be broken out into four discrete 25G SFP28 connections for flexible deployment in data centers and enterprise networks .

After-Sales Services

Vendors like ETU-LINK provide comprehensive after-sales support for optical modules, which is relevant for New Zealand customers: 1. Technical Support

- 24/7 Consultation: Round-the-clock technical assistance and fault reporting, with responses typically within 24 hours .
- Remote Assistance: Troubleshooting, software adjustments, and technical consultation via phone or remote access....
