

Nigerian Fiber Optic Distribution Frame

Article Overview

Niger has completed a 1,031 km national and cross-border fiber optic network under the Trans-Sahara Optical Fibre Backbone Project, connecting key regions and neighboring countries.

Overview of the Network

Niger's fiber optic network, completed in November 2025, spans 1,031 km and is part of the Trans-Sahara Optical Fibre Backbone Project (TSB), financed by the African Development Bank Group with a total cost of approximately €43-50 million . The project includes two main components: the construction of the fiber optic network and the installation of a Tier III national data center, which will serve as a central hub for data management and digital services .

Key Routes and Distribution

The fiber optic network covers five major routes across Niger, linking the country internally and to neighboring states:

- Arlit-Assamaka-Algerian border (220 km)
 - Diffa-N'Guigmi-Chadian border (186 km)
 - Zinder-Magaria-Nigerian border (117 km)
 - Niamey-Dosso-Gaya-Benin border (300 km)
 - Niamey-Makalondi-Burkina Faso border (118 km)
- Additionally, an 88-km urban local loop connects main administrative sites to the future national data center, facilitating efficient distribution and management of digital services within urban ar...
