

On-site cable connection for distribution box

Article Overview

Properly connecting cables to a distribution box requires following a safe, sequential procedure, starting with the Earth connection, then Neutral, and finally the live phases, while ensuring all circuits are correctly wired and secured.

Safety Precautions

Before starting any work:

- Turn off the main power supply to prevent electrical shock .
- Ensure only qualified personnel handle high-voltage connections .
- Verify the installation site is dry, ventilated, and free from flammable or corrosive substances .
- Use insulated tools and wear appropriate personal protective equipment (PPE).

Step-by-Step Connection Procedure

- Secure the Distribution Box: Mount the box at an accessible height and ensure it is stable and unobstructed .
- Connect the Earth (Ground) Cable First: Open the Earth cover, insert the Earth cable into the designated terminal, and secure it. This ensures safety in case of faults .
- Connect the Neutral Cable: Open the Neutral cover and attach the neutral wire to its terminal. In some boxes, this step may be skipped if a 4-port configuration is used .
- Connect Live Phase Wires (L1, L2, L3): Align each phase connector with the corres...
