

Optical Receiver Module Company

Article Overview

Leading optical receiver module manufacturers include Zhongji Innolight, Eoptolink, Accelink, InnoLight, Coherent, Lumentum, and Sumitomo Electric, offering high-speed modules for telecom and data center applications.

Key Manufacturers and Their Focus

Zhongji Innolight Co., Ltd. is a global leader in high-end optical communication transceiver modules, providing 100G, 200G, 400G, and 800G modules for cloud data centers and telecom networks, including 5G fronthaul, midhaul, and backhaul solutions . Eoptolink Technology Inc., Ltd. specializes in high-speed optical modules, including point-to-point and PON optical modules, widely used in data centers, FTTx, LTE, and smart grid applications . Accelink Technologies Co., Ltd. offers a full industry chain solution from optical chips to modules and subsystems, with expertise in PLC, III-V, and silicon photonics platforms, supporting telecom, data, and broadband access networks . InnoLight Technology provides a complete line of optical modules for 100G to 800G applications, focusing on high-speed transceivers for global communication equipment vendors . Coherent (formerly II-VI Finisar) designs and manufactures optical transceivers for SFP, SFP+, and high-speed modules, emphasizing coherent optics and integrated laser technology for next-generation networks . Lumentum Operations LLC develops high-speed optical transceivers for 400G and 800G data rates, targeting data centers and cloud infrastructure with advanced coherent optics solutions . Sumitomo Electric Industries Ltd. provides optical transceivers and components for datacom, metro, and long-haul networks, focusing on energy efficiency and reliability for 5G and data center connectivity
