

Paraguay Electrical Distribution Box Project

Overview

This investment aims to improve the reliability, capacity, and efficiency of Paraguay's electricity system, addressing rising demand and reducing blackout risks, particularly in the metropolitan and central systems that account for two-thirds of national electricity consumption. The EIB and IDB are each providing up to \$70 million in financing, complemented by an EU investment grant of up to €10 million. The €225 million operation will focus on building the Emboscada substation and. The National Electricity Administration (ANDE) and CAF Development Bank of Latin America—signed a loan agreement for USD 150 million under the Power Transmission and Distribution System Improvement Project for Paraguay's Metropolitan System. This will be used to revamp the transmission system and. Ensure a sustainable electricity supply for the country's economic development. The Request was submitted by Federacion de.
