

Parameters of a 48-core fiber optic distribution box

Article Overview

A 48-core fiber optic distribution box supports high-density fiber management with indoor/outdoor deployment, IP55 protection, splitter compatibility, and organized cable management for FTTH and commercial networks.

General Features

- Capacity: Supports up to 48 fiber connections, suitable for high-density residential complexes, commercial buildings, and data centers .
- Design: Dual-use for indoor and outdoor deployment with weatherproof enclosures; IP55-rated protection against dust and moisture .
- Material: Constructed from cold-rolled steel or durable ABS/PC+ABS plastics, providing robust protection against physical damage and environmental exposure .
- Mounting Options: Wall-mounted or pole-mounted configurations for flexible installation in various network environments .

Fiber Management

- Splitter Integration: Pre-terminated with PLC splitters (up to 1x32 or multiple splitters) for rapid deployment and reduced field labor .
- Cable Management: Internal layout designed to minimize clutter, maintain proper bend radius ($\geq 30\text{mm}$), and separate incoming/outgoing fibers to reduce microbend losses .
- Splice and Termination Areas: Typically includes a rear splice tray for slack and sp...
