

Performance Characteristics of Polish Galvanized Cable Trays

Overview

The full-shaped HDG trays are dipped into a large bath of hot, liquid zinc. This encompasses every corner, hole, and edge. It is this heavy shield that makes the metal resistant to rain and salt air for over 20 years or. cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to si osure, overheating or. , is a welded wire-mesh cable management system made of high-strength steel wire. The selection of material and finish is a function of the environment in wh tant in a wide range. We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore.
