

Pre-fabricated optical cable cable type

Article Overview

Pre-fabricated optical cables are ready-to-install fiber optic solutions available in various fiber types, core counts, and connectorized models for data centers, industrial, and telecom applications.

Overview

Pre-fabricated or pre-assembled optical cables are designed for quick deployment without the need for splicing or specialized tools. They come with pre-terminated connectors and are often delivered in reels or rings, ready for immediate installation. These cables are widely used in data centers, backbone networks, industrial sites, and telecommunication systems.

Key Specifications

- Fiber Types: Singlemode (G.652.D) and multimode (OM1, OM2, OM3, OM4) fibers are commonly used.
- Core Count: Options range from 1-core pigtailed to multi-core cables with up to 288 fibers for large-scale networks.
- Jacket Types: LSZH (Low Smoke Zero Halogen), flame-retardant, halogen-free, and robust outer sheaths for indoor or outdoor use.
- Buffering: Tight-buffered or loose-tube designs, often color-coded for easy identification.
- Bend Radius: Minimum bend radius typically ranges from 30 mm for installation to 30 mm for installed conditions for 900 μ m tight-buffered fibers.
- Temperature Range: Standard operating ranges are -20°C to +70°C.....
