

Price of Direct-Buried Optical Cable Projects

Article Overview

Direct-buried optical cable typically costs between \$1 and \$50+ per linear foot, depending on cable type, installation method, and terrain.

Cost Overview

The price of direct-buried fiber optic cable varies widely based on several factors:

- **Cable Type and Specifications:** Armored cables with steel tape or wire for protection against mechanical damage and soil erosion are more expensive. Single-mode fiber generally costs more than multi-mode fiber, and higher fiber counts increase the price .
- **Installation Method:** Direct burial is generally more convenient than conduit or aerial installation, but underground installation costs range from \$5,000 to \$20,000 per mile, while aerial installation is typically \$8-\$12 per linear foot .
- **Terrain and Project Complexity:** Rocky, urban, or mixed terrain increases trenching and labor costs. Longer runs reduce per-foot costs due to fixed setup efforts .
- **Additional Costs:** Labor, splicing, testing, shipping, and permits can significantly affect total project costs. Pre-terminated cables can save up to 75% in installation time and labor .

Typical Price Ranges

- **Per Foot:** \$1 to \$50+, with standard outdoor runs often falling between \$0.60 and...
