

Price of Sloping Top Cover Plate for Cable Trays

Article Overview

The price of sloping top cover plates for cable trays varies widely depending on material, size, and supplier, typically ranging from \$20 to \$150 per foot or per standard section.

Factors Affecting Price

- **Material:** Covers can be made from aluminum, mild steel, galvanized steel, or stainless steel (304/316). Stainless steel is the most expensive due to corrosion resistance, while aluminum is lighter and moderately priced, and mild steel is the most economical option .
- **Design and Type:** Sloping top covers, also called hat-shaped or ventilated covers, are more complex than flat covers, which increases cost. Ventilated or perforated designs may also add to the price .
- **Length and Width:** Standard lengths are usually 12 feet, with options for 5 or 6 feet. Wider trays or custom lengths can increase the cost .
- **Finishing:** Coatings such as pre-galvanized, hot-dip galvanized, or powder-coated finishes affect durability and price. Outdoor or corrosive environments often require higher-grade finishes .
- **Supplier and Location:** Prices vary by supplier and region. Bulk orders or OEM customization may reduce per-unit cost, while small orders or specialized designs may be more expensive .
