

Price of Trapezoidal Cable Tray Beams

Article Overview

The price of trapezoidal cable tray beams varies widely depending on material, size, finish, and quantity, and is typically provided via a formal quotation from suppliers.

Pricing Overview

Trapezoidal cable tray beams are available in galvanized steel, stainless steel, aluminum, and powder-coated finishes, and prices depend on the dimensions, load capacity, and customization requirements . Standard industrial suppliers, such as Alibaba and McMaster-Carr, offer these trays for commercial and industrial applications, but exact prices are not listed online because each order is tailored to project specifications .

Factors Affecting Cost

- **Material:** Hot-dip galvanized steel is generally less expensive than stainless steel or aluminum, while powder-coated finishes may add to the cost .
- **Dimensions:** Width, height, and length of the tray directly influence the price. Larger spans or heavier-duty trays cost more.
- **Customization:** Special sizes, perforations, or integrated ladder designs increase the price. Suppliers often require detailed specifications to provide a quotation .
- **Quantity:** Bulk orders usually reduce the per-unit cost, while small orders may incur higher prices.
- **Standards Compliance:** Trays meeting DIN EN 61537 or other international standards may have slightly higher costs due to quality assurance and certification .
