

Price of a 250kW Photovoltaic Combiner Box

Article Overview

The price of a 250kW photovoltaic combiner box typically ranges from \$1,500 to \$5,000 depending on features, brand, and customization.

Pricing Overview

For a 250kW PV system, combiner boxes are a critical component that consolidates multiple PV strings and provides overcurrent and surge protection. Standard market prices for high-quality combiner boxes, such as those from ABB, designed for 250kW systems with multiple inverters, are generally in the \$1,500-\$5,000 range depending on specifications like amperage rating, number of inputs, and monitoring capabilities (e.g., voltage, current, temperature, and SPD status) .

Factors Affecting Price

- **Brand and Certification:** Premium brands like ABB, Weidmüller, and Citel offer IEC/UL-certified combiner boxes, which are more expensive but ensure compliance and reliability .
- **Number of PV Strings:** Combiner boxes for utility-scale systems with multiple MPPT inverters or high string counts cost more due to additional fuses, busbars, and monitoring equipment .
- **Monitoring and Protection Features:** Boxes with integrated string monitoring, surge protection devices (SPD), and switch isolators are priced higher but improve system performance and ROI .
- **Customization:** Bespoke solutions tailored to specific PV layouts or environmental...
