

Price of elevator electrical distribution box

Article Overview

Elevator electrical distribution boxes typically range from \$200 for basic models to over \$1,500 for modular, high-capacity, or customized units.

Price Ranges and Factors

- **Basic Models:** Simple elevator distribution boxes with standard metal or plastic enclosures and limited circuit capacity generally start around \$200–\$400 per unit. These are suitable for small-scale or standard elevator systems and provide essential power distribution and circuit protection .
- **Modular and Mid-Range Models:** Boxes with modular designs, integrated relays, contactors, circuit breakers, and PLCs for precise control typically cost \$500–\$1,000. These units often feature metal enclosures, CE certification, and support higher current ratings (e.g., 120V/30A), making them suitable for industrial or multi-elevator installations .
- **Premium and Customized Units:** High-end or fully customized distribution boxes, including OEM branding, IP-rated enclosures, busbar modifications, and advanced monitoring features, can exceed \$1,500 per unit. Prices depend on the number of circuits, load capacity, material quality, and additional features like surge protection or smart monitoring .

Key Cost Influencers

- **Material and Build Quality:** Metal enclosures (galvanized steel or aluminum) are more expensive than plastic but offer better durability and corrosion resistance
