

Price per kilometer for direct-buried optical cable laying

Article Overview

The cost of laying direct-buried optical fiber cable typically ranges from \$40,000 to \$350,000 per kilometer, depending on terrain, cable type, and installation complexity.

Cost Breakdown

Cable Material: Armored direct-buried fiber optic cables cost approximately \$6–\$14 per linear foot, which translates to roughly \$20,000–\$46,000 per kilometer for the cable alone, depending on specifications such as fiber count, sheath type, and armoring . **Trenching and Labor:** Excavation and trenching labor can add \$7–\$50 per linear foot (\$23,000–\$164,000 per kilometer), with costs increasing in rocky soil, high water tables, or urban areas requiring traffic control . **Conduits and Protection:** While direct burial can avoid ducts, adding HDPE or PVC conduits for future upgrades costs an additional \$2–\$4 per foot (\$6,500–\$13,000 per kilometer), . **Splicing and Termination:** Fiber splicing, handholes, and termination enclosures contribute to the total cost, typically ranging from \$200–\$800 per access point, with the number of splices depending on route length and network design . **Equipment Rental:** Trenching equipment or directional boring rigs may cost \$200–\$1,500 per day, depending on method and terrain . **Urban vs Rural Variations:** Urban projects generally cost more due to permitting, traffic control, and complex rights-of-way, while rural installations may be 10–40% cheaper .
