

Quotation for fusion splicing installation of 24-core fiber optic patch panel

Article Overview

Estimated cost for fusion splicing a 24-core fiber optic patch panel ranges from \$1,200 to \$3,600, depending on labor, site conditions, and testing requirements.

Cost Breakdown

1. Per-Splice Labor: Fusion splicing typically costs \$50–\$150 per splice point for commercial projects, including OTDR verification and documentation . For a 24-core patch panel, assuming one splice per fiber, the labor cost would range from \$1,200 to \$3,600. 2. Enclosure Preparation: Some contractors charge a fixed fee for enclosure prep, typically around \$275 per enclosure . This includes preparing the patch panel for splicing, cable management, and ensuring proper bend radius control. 3.

Materials:

- Fiber Optic Splice Module (FOSM): Supports 24 fusion splices and provides cable management, slack control, and protection for splices .
- 24-Port DIN Rail Patch Panel: Pre-loaded with LC duplex adapters, suitable for both singlemode and multimode fibers, and designed for fusion splicing .
- Pigtails and Heat-Shrink Sleeves: Required for each splice, typically included in professional installation packages. 4. Testing and Documentation: Every fusion splice should be OTDR-verified to ensure low-loss connections (
