

# Rainproof and dustproof power distribution box equipment

## Article Overview

IP65-rated power distribution boxes provide reliable protection against rain, dust, and harsh outdoor conditions, ensuring safe and stable electrical distribution.

### Key Features

**Ingress Protection (IP65-IP68):** These boxes are designed to prevent dust and water ingress, making them suitable for outdoor, industrial, and humid environments. IP65 ensures complete protection against dust and low-pressure water jets, while IP66-IP68 models offer higher resistance for more extreme conditions (GEYA, SinoBreaker, ZCEBOX, J&HW Group) . **Durable Materials:** Most rainproof and dustproof enclosures are made from ABS or polycarbonate plastics, or corrosion-resistant metals like sheet metal or fiberglass. These materials provide impact resistance, UV stability, and long-term durability in outdoor settings (SinoBreaker, J&HW Group) . **Design and Accessibility:** Many models feature transparent PC covers for easy inspection, push-to-open doors, and secure latches to prevent accidental closure. Internal layouts often include DIN rails, cable trays, and conduit entry points for flexible wiring and efficient installation (GEYA, SinoBreaker) . **Electrical Safety:** Plastic insulation and integrated circuit breakers or leakage protection prevent accidental shocks and overloads, ensuring safe operation in industrial, residential, and municipal applications (J&HW Group, YINENG Electric) .
