

Relay protection ret

Article Overview

The RET series of transformer protection relays includes:

-

RET615: A dedicated transformer protection and control relay designed for the protection, control, measurement, and supervision of power transformers in utility and industrial power distribution systems .

-

RET620: This relay is ideal for managing both power and step-up transformers, providing protection, control, measurement, and supervision, and is also suitable for voltage regulation .

-

RET670: Known for its extremely fast differential protection function, this relay is designed for demanding applications in transformer protection .

These relays are essential for ensuring the safe and efficient operation of transformer systems.
