

Replacing the switch with a distribution box

Article Overview

Replacing a switch in a distribution box requires turning off the main power, carefully removing the old switch, and installing a new one while following safety and code regulations.

Safety First

Before starting, turn off the main power supply at the distribution box to prevent electric shock. Use a voltage tester to confirm that all wires, including live and neutral, are de-energized (). Always wear insulated gloves and safety goggles.

Tools and Materials Needed

- Screwdrivers (crosshead and flathead)
- Voltage tester
- Wire strippers and electrician's pliers
- Wire connectors (wire nuts) and insulating tape
- New switch or switch module compatible with the existing box
- Marker pen for labeling wires
- Optional: hammer, chisel, spirit level, gypsum patching compound ()

Step-by-Step Replacement

- Turn Off Power: Shut off the main breaker and mark the circuit to avoid confusion ()....
