

Requirements for the Use of Optical Cable Equipment in Malaysia

Overview

The Electrical Supply Act 1990 and Electrical Regulation 1994 require manufacturers to apply for Certificate of Approval (COA) and affix the product with the SIRIM Label or certification mark. Test report with or equivalent to Malaysia Standards (MS) issued by a DSM recognised. The Communications and Multimedia Act 1998 (Laws of Malaysia Act 588) ('the Act') provides for a Technical Standards Forum designated under Section 184 of the Act or the Malaysian Communications and Multimedia Commission ('the Commission') to prepare a technical code. The technical code prepared. What documents need to be submitted to SIRIM QAS for the certification process?

How much is the certification fees?

Does amateur radio equipment require certification?

What sort of certification mark or label must be used for all certified communications equipment?

What importation requirements are. All communications equipment which are required to be certified shall be certified by the Commission or its registered certifying agency in accordance with the Communications and Multimedia (Technical Standards) Regulations 2000. The certification process for Special Approval may be. Technical Code (TC) is a voluntary industry code that sets out the requirements and best practices to ensure network facilities, services and equipment are interoperable and safe. Fourteen (14) technical codes have been submitted by MTSFB for registra...
