

ST Fiber Optic Connector Standard

Article Overview

The ST fiber optic connector is a widely used optical fiber connector known for its bayonet twist-lock mechanism and 2.5mm ceramic ferrule. It is designed for reliable connections in various applications, including local networks, corporate environments, and military use . The ST connector allows for easy connection and disconnection, making it suitable for both long and short-distance applications . Additionally, it is field-installable, which simplifies the installation process . Overall, the ST connector is valued for its durability and ease of use in fiber optic systems .
