

# Should network cabinets be equipped with devices on both sides

## Overview

servers, switches, routers) face one direction on the rack?

Or should I share the same U on both sides?

A: Yes. You should have everything facing the same way, which can allow your equipment to cool more effectively as they do not block the hot exhaust. Q1: Should every device (e. In order to meet the normal operation of these devices in the cabinets, when the computer room cabinets are full of various cabinets and devices, we need to consider how to place the network cabinets?

1. Network cabinet placement skills (1) Before. be isolated from data cables on opposite sides of the rack to reduce the lengths of cable resulting in the need to deal with excess cable. A well-thought-out layout maximizes space and supports future expansion, ensuring long-term efficiency in server rack organization. Different TYPES OF SERVER RACKS. In this article we will talk about network cabinets, patch panels and cable management. The recommended floor-to-ceiling height is 244 cm.
