

Somali Fiber Optic Sensor Manufacturing Plant

Article Overview

Currently, there is no known fiber optic sensor manufacturing plant in Somalia; the country primarily hosts fiber optic network operators rather than sensor manufacturers.

Current Fiber Optic Industry in Somalia

Somalia has a growing fiber optic infrastructure, primarily focused on telecommunications and internet connectivity. Key players include:

- Somali Optical Network (SOON): Provides high-quality internet connectivity, local loop capacity, and data transit services, leasing dark fibers to telecom companies .
- Dalkom Somalia: Operates an extensive network covering over 55,000 km of optical fiber across 30 African countries, with international reach to Europe and global cities. It has invested in submarine cables like EASSy, EIG, and WACS, offering resilient and high-speed connectivity .
- Somcable: A wholesale fiber optic operator covering 80% of Somaliland and linking Djibouti, Somaliland, and Puntland. Its network uses Dense Wavelength Division Multiplexing (DWDM) capable of transmitting over 400 Gb/s . These companies focus on network deployment, data transmission, and connectivity services, rather than manufacturing fiber optic sensors.
