

Surface-mounted dustproof distribution box

Article Overview

Surface-mounted dustproof distribution boxes are durable enclosures designed for safe electrical distribution, offering IP65 protection against dust and water for indoor and outdoor use.

Key Features

Protection and Material: These boxes are typically made from high-quality plastics such as polycarbonate (PC) or acrylonitrile butadiene styrene (ABS), or from powder-coated steel for enhanced mechanical strength . They provide IP65 protection, ensuring they are dust-tight and resistant to water jets, making them suitable for damp rooms, garages, gardens, and outdoor installations .

Module Capacity and DIN Rails: Surface-mounted boxes often accommodate 1 to multiple rows of modules, with standard sizes like 12TE per mounting rail, and can house circuit breakers, fuses, or switching elements . Some models include neutral and earth busbars for safe wiring .

Doors and Visibility: Many boxes feature transparent polycarbonate doors, allowing quick inspection of fuses or status indicators without opening the enclosure. Opaque doors are also available for aesthetic or security purposes. Hinges can be on either side, and some models include lockable doors with keys for controlled access .

Installation and Wiring: Surface-mounted boxes are designed for easy wall installation with pre-drilled cable entries and optional cable glands. Some models offer removable doors for easier cable insertion and configuration, and come with all necessary mounting screws and terminals .

Applications: These distribution boxes are suitable for residential, commercial, and industrial use, including damp or wet room...
