

Tfn optical power meter otdr

Overview

The TFN F7 OTDR comes with a built-in OPM (Optical Power Meter) function, allowing field engineers to measure optical power directly on-site without carrying additional equipment. more Just insert the old batteries into the drill and every house needs this but no one does it! 467 Radar Sensors from \$3 to over. The F7 Optical Time Domain Reflectometer (OTDR) is a rugged, all-in-one fiber optic tester engineered for mission-critical network diagnostics and field maintenance. It integrates OTDR, VFL, OPM, optical loss measurement, end-face inspection, Ethernet testing, and remote operation in a single. Unparalleled Distance Measurement: The TFN F7-S4 OTDR boasts an impressive measuring distance of 3-240km, making it an ideal tool for extensive fiber optic network testing and verification. It is equipped with an optical power meter, a visual error position, an event card, a RJ45 line search and other functions. With a wide dynamic range of 28/26dB and 1310/1550nm single-mode testing capability, the MN3 can handle all types of network architectures, from short-haul LANs to long-haul.
