

The only fiber optic cable in China

Article Overview

China does not have a single fiber optic cable; it is the world's largest producer, with multiple leading manufacturers supplying diverse types of cables for global and domestic networks.

China's fiber optic cable industry is a global powerhouse, producing over 60% of the world's optical fiber and generating more than USD 10 billion in market value annually . The country supports a wide range of applications, from long-haul submarine cables to FTTH (Fiber to the Home) deployments, 5G infrastructure, and emerging 6G test networks . Production is highly diversified, with annual output exceeding 1.5 billion core-kilometers, and manufacturers invest heavily in R&D, automation, and sustainability initiatives .

Leading Manufacturers

- YOFC (Yangtze Optical Fibre and Cable Joint Stock Limited Company): China's largest fiber optic cable producer, headquartered in Wuhan, with an annual capacity of 300 million core-kilometers. YOFC produces ultra-low-loss fibers, high-density multi-core cables, and submarine cables, and holds over 500 patents in fiber technology .
- Hengtong Group: A major player in both power and fiber optic cables, Hengtong is notable for its comprehensive R&D and production capabilities, including submarine cables. It has established joint ventures internationally, such as in Brazil, to expand global reach .
- Other notable manufacturers: Companies like ZTO Cable, OWIRE, and HTGD Jiangsu Hengtong Optic-Electric Co., Ltd. are recognized for high-quality products, vertical integration, and export capabilities to over 100 countries
