

UPS power supply system off-grid system 20kW quotation

Article Overview

A 20kW off-grid UPS system typically includes hybrid inverters, battery banks totaling 48kWh, and zero-transfer technology for uninterrupted power, with prices ranging from approximately US\$13,648 for gel battery designs to customized lithium-based systems.

System Overview

A standard 20kW off-grid UPS system includes the following components:

- Inverters: 4 × 5000W 48V hybrid inverters with zero-transfer time, ensuring instant switching from mains to battery power without interruption, ideal for sensitive electronics like servers and datacentres .
- Battery Storage: 2 × 24kWh 500Ah battery banks, providing a total of 48kWh of stored energy. Lithium or gel battery options are available depending on budget and performance requirements .
- Cabling and Accessories: Includes 8m tinned copper battery cables, thermal over-current circuit breakers, parallel connection kits, and loose ring terminals for installation .
- Control Features: Dry contact ports allow automatic generator activation or relay switching when battery voltage drops below a set threshold, optimizing fuel usage for hybrid setups .
