

Uruguay Smart Building Vertical Shaft Fiber Optic Cable Price

Article Overview

Fiber optic cable for smart building vertical shafts in Uruguay typically ranges from UYU 62.80 per meter for standard indoor monomode cables, with higher costs for armored or high-strand-count cables.

Pricing Overview

In Uruguay, indoor monomode fiber optic cables suitable for vertical shafts, such as 2-fiber G657 cables with fire-resistant thermoplastic jackets, are priced around UYU 62.80 per meter, including basic accessories and installation elements . These cables are designed for indoor riser applications, with aramid reinforcement for tensile strength and halogen-free, flame-retardant sheathing, making them suitable for smart building vertical shafts .

Factors Affecting Cost

- **Fiber Type and Strand Count:** Single-mode fibers (like G657) are standard for high-speed building networks. Prices increase with strand count; for example, a 12-strand cable may cost roughly double a 2-strand cable .
- **Cable Construction:** Armored cables for harsh environments or outdoor runs can cost \$0.50 to \$5 per foot (approx. UYU 20-200 per meter), depending on protection level .
- **Installation Complexity:** Costs rise with vertical shaft installation due to labor, conduit, and termination requirements. While material costs are clear, labor and splicing can significantly increase total project expenses
