

Vietnam delivery date for active optical fiber cable OSFP

Article Overview

Delivery of OSFP active optical fiber cables in Vietnam typically ranges from 2 to 6 weeks, depending on supplier stock, production capacity, and shipping logistics.

Market and Supplier Context

Vietnam has a rapidly growing fiber optic infrastructure, driven by 5G deployment, FTTH expansion, and government digital transformation initiatives, with major players including FPT Telecom, Viettel Group, and VNPT actively expanding networks in urban centers like Ho Chi Minh City, Hanoi, and Da Nang . Local manufacturers such as Viet Fiber offer full in-house production of fiber optic cables, which can reduce lead times compared to imported products .

Factors Affecting Delivery Time

- **Local Manufacturing:** Suppliers like Viet Fiber can provide faster delivery due to vertical integration, controlling production from raw materials to final assembly .
- **Import Dependencies:** Some OSFP active optical cables, especially high-speed 800G models, may require importation from international manufacturers, which can extend delivery by 3-6 weeks depending on customs and shipping .
- **Market Demand:** Vietnam's fiber optic market is experiencing high demand due to 5G and data center expansion, which can temporarily increase lead times for high-capacity cables .
- **Order Size and Customization:** Standard OSFP cables in stock may ship within 2-3 weeks, while custom lengths or specialized configurations may require 4-6 weeks....
