

Vietnam fiber optic cable burned out

Overview

On December 31, 2024, Việt Nam successfully reconfigured the AAE-1 cable's branch S1H5 after repairs, restoring international connections between Việt Nam, Hong Kong (China), and Singapore. However, the APG and Intra Asia (IA) cables continue to experience. Vietnam has still maintained stable Internet connectivity amid a malfunction on the AAE-1 undersea cable, thanks to its backup infrastructure and the Vietnam-Singapore Terrestrial Cable Network (VSTN), according to the Vietnam Telecommunications Authority under the Ministry of Science and. (Homeland) - The capacity of the APG undersea fiber optic cable is currently only restored to 50%. The error on branch S7 of the newly repaired APG undersea cable was fixed on June 29, but a new error. All 5 out of 5 undersea fiber optic cable routes connecting Vietnam internationally encountering problems. On the morning of February 21st, an Internet service provider in Vietnam disclosed. Despite the full restoration of the Asia-Africa-Europe-1 (AAE-1) undersea cable, two other international undersea cables are still facing issues, which are affecting Vietnam's internet connection speed and service quality to international destinations. International partners have not yet.
