

Visco fiber optic patch panel

Overview

These high-quality fiber patch panels come in multimode (62.5/125 or 50/125) and single-mode (9/125), plus single-mode APC (9/125) versions with 16, 24, 48, or 96 fiber optic connection couplers, featuring ceramic or bronze alignment sleeves. Full patching platforms include FX ECX for LAN environments, FX UHD for high-density fiber channels and the DCX System used primarily in data centers where high amounts of fiber connections and density are the key requirements, as in optical. A fiber patch panel is a mounted enclosure—either rack-mounted or wall-mounted—used to terminate, manage, and interconnect multiple fiber optic cables. It acts as a hub for organizing splices and patch cords, streamlining fiber management and preserving signal integrity. Cable Organization: With the growth of the fiber industry, a wide array of fiber optic patch panels have been developed to fit the many needs of these varying environments. Propel Series Sliding Fiber Optic Panels for holding Propel modules, adapter packs and splice cassettes EPX Fiber Optic Panel available in either G2 or LGX/PNL 1U, 2U or 4U fixed or sliding configurations FMT (Fiber Management Tray) Series Fiber Optic Panels FOMS-FPS and FOMS-FPS-HD Fiber. Patch panels and Optical Distribution Frames (ODFs) provide a clean and flexible solution for terminating and cross-connecting fibers in key network hubs like data centers and central offices. They serve as the central point where feeder cables, distribution lines, and active equipment ports meet.
