

What are some manufacturers of skeleton-type optical cables

Article Overview

Skeleton-type optical cables are specialized fiber optic cables designed for high-density, flexible, and reliable data and power transmission, with manufacturers including ZR Cable, Optical Cable Corporation (OCC), and other global fiber optic producers.

Overview of Skeleton-Type Optical Cables

Skeleton-type optical cables feature a central skeleton structure with rectangular grooves that house optical fiber ribbons, along with side grooves for power or signal transmission units. This design provides high optical density, flexibility, ease of installation, and low maintenance costs. The cables are suitable for applications requiring both data and power transmission, and they are often used in FTTH (Fiber-to-the-Home) networks and industrial environments .

Notable Manufacturers

- ZR Cable
- Offers full-dry skeleton tight-buffered fiber optic cables, which replace traditional optical fiber ribbons with tight-sleeved loose fibers to reduce resin wrapping and facilitate construction and splicing.
- Features include moisture resistance, lateral pressure resistance, and easy longitudinal sectioning, making them suitable for FTTH access networks .
- Optical Cable Corporation (OCC)...
