

What is a SC fiber optic panel

Overview

SC stands for Subscriber Connector and is one of the most widely recognized fiber terminations in telecom. 5 mm ceramic ferrule within a rectangular body and a simple push-pull latch that provides a positive click when seated. Here is a plain-language breakdown of the four main connector types, the specs that actually matter, and how to match a cable to your equipment without guesswork. Fiber optic patch cables are short-run assemblies—typically under 10 meters—with a finished connector on each end. They bridge the gap. SC fiber adapter panels pre-loaded with fiber adapters provide a means to connect backbone-to-backbone or backbone-to-horizontal fiber cabling. They directly affect insertion loss, return loss, reliability, and long-term network stability. 3 Which Type of SC Connector Should You Use?
