

What is a secondary distribution box factory in Singapore

Article Overview

A secondary distribution box factory in Singapore manufactures and assembles sub-distribution electrical panels that distribute power from the main supply to specific areas or equipment.

What is a Secondary Distribution Box?

A secondary distribution box, also known as a sub-distribution box, is an electrical panel responsible for distributing electricity from the primary distribution board to a specific area, building section, or group of equipment. It typically contains:

- Main circuit components: main isolation switch and circuit breaker or fuse
 - Shunt circuits: secondary isolation switches and fuses or breakers for individual loads
- These boxes are part of a multi-level distribution system, often used in residential, commercial, or industrial settings to ensure safe and organized power distribution. In a three-level system, the primary distribution box feeds multiple secondary boxes, which in turn may supply tertiary boxes for individual equipment or rooms .

Role of a Factory

A secondary distribution box factory in Singapore is a facility that designs, manufactures, and tests these electrical panels. Such factories typically:...
