

What s the best way to cut the pigtail cable

Overview

The pigtail wires should be cut from the same gauge and color wire as the existing circuit, typically 12-gauge for a 20-amp circuit or 14-gauge for a 15-amp circuit. Begin by preparing the existing wires in the electrical box, trimming any damaged ends to ensure a clean copper. Lineman's pliers are the preferred tool for gripping and twisting multiple conductors together, providing the leverage necessary for a secure mechanical splice. This method involves connecting the circuit's main wires to a short jumper wire, or pigtail, which then connects to the terminal of the device. This guide provides a.
