

What type of electrical distribution box is used in a household

Article Overview

Household electrical distribution boxes, also called breaker boxes or DB boxes, come in several types including single-phase, three-phase, surface-mounted, flush-mounted, and smart distribution boxes.

Overview

A distribution box is the central hub of a home's electrical system, receiving power from the main supply and distributing it safely to various circuits. It houses protective devices like circuit breakers, fuses, and residual current circuit breakers (RCCBs) to prevent overloads, short circuits, and electrical hazards .

Common Types of Household Distribution Boxes

1. Single-Phase Distribution Boxes

- Designed for residential use with lower power loads.
- Typically house fewer circuit breakers.
- Ideal for standard homes with typical lighting, outlets, and small appliances .

Three-Phase Distribution Boxes

- Used in larger homes or small commercial setups requiring higher power loads.
- Can handle more circuits and heavier appliances.
- Often installed in homes with high-demand equipment like HVAC systems or workshops .

3. Surface-Mounted Distribution Boxes...
