

What type of steel is used for cable trays and what is their price

Overview

SS304 is the common standard. It works for most normal situations. If your environment is tough, you use SS316L. Heavy duty cable trays and cable ladders are manufactured from pre-galvanized, electro-galvanized, or hot-dipped galvanized sheet metal, designed to meet ideal environmental working conditions for indoor and outdoor use in commercial or industrial environments with high cable density. This article provides a detailed comparison of these materials, with a focus on why steel cable trays stand out as the superior option for most applications. Overview of Electrical Cable Tray Materials Aluminium cable trays are. Stainless Steel Cable Trays: Known for their exceptional resistance to rust and extreme temperatures, stainless steel trays are commonly used in harsh environments, such as chemical plants or offshore facilities. They offer a simple, effective solution for cable management.
