

What types of fiber optic cables are used for cabling in Bangladesh

Article Overview

Bangladesh primarily uses a variety of outdoor and indoor fiber optic cables, including single-mode and multimode types, armored and non-armored, for aerial, duct, and direct burial applications.

Outdoor Fiber Optic Cables

For outdoor deployment, Bangladesh commonly uses loose tube and self-supporting cables designed to withstand environmental stress:

- GYXTW Cable: Central loose tube cable suitable for duct and aerial applications, providing protection against moisture and mechanical stress .
- GYTA Cable: Aluminum-clad steel reinforced cable for long-distance outdoor distribution and local area networks, offering high tensile strength .
- GYFTY Cable: Dielectric loose tube cable used for aerial and trunk power transmission systems, ideal for access networks .
- GYTY53 / GYFTY53: Armored and double-sheathed cables designed for direct burial underground, providing extra mechanical protection and durability .
- Figure 8 Self-Supporting Cable: Stainless steel or galvanized steel reinforced, suitable for aerial, duct, and buried methods, supporting long-distance communication .
