

Where to find factories that make optical splitters

Article Overview

Optical splitters are manufactured worldwide, with major production hubs in Asia, North America, and Europe.

Asia

Asia, particularly China, South Korea, and Japan, is a leading region for optical splitter manufacturing. Companies such as HYC Co., Ltd, Browave Corporation, and Argyle International are based in China and specialize in PLC splitters, FBT couplers, and other fiber optic components for telecommunications, 4G/5G networks, and data centers . South Korea and Japan also host manufacturers producing high-quality optical components for both domestic and international markets.

North America

In the United States and Canada, several manufacturers focus on both standard and custom optical splitters. Notable companies include Chroma Technology Corporation in Vermont, Moxtek, Inc. in Utah, and other suppliers listed on ThomasNet, which provide optical splitters, thin-film coatings, and laser optics for research, industrial, and telecommunications applications . These manufacturers often serve high-precision and specialized markets, including scientific instrumentation and defense.
