

Which fiber optic router interface is best

Article Overview

The NETGEAR Nighthawk RS700S WiFi 7 router is currently considered the top choice for fiber optic connections, offering multi-gig speeds, wide coverage, and advanced features.

Key Considerations for Fiber Routers

When choosing a router for fiber optic internet, it's important to ensure it can handle high-speed connections and fully utilize your fiber plan. Key features to look for include:

- **Wi-Fi Standard:** Wi-Fi 6 or Wi-Fi 7 is recommended to maximize fiber speeds, especially for plans above 1 Gbps .
- **Multi-Gigabit WAN/LAN Ports:** Routers with 2.5 Gbps or 10 Gbps WAN ports prevent bottlenecks and allow full utilization of high-speed fiber .
- **Coverage and Antennas:** Internal or external antennas should provide sufficient coverage for your home or office size. Tri-band routers with a dedicated 6 GHz band reduce interference .
- **Device Capacity:** Consider routers that can handle multiple devices simultaneously, particularly for smart homes or offices .
- **Security Features:** Built-in security suites, VPN support, and parental controls enhance network safety .

Top Router Recommendations

- NETGEAR Nighthawk Tri-Band WiFi 7 Router (RS700S)
- Supports Wi-Fi 7 for ultra-fast speeds and low latency...
