

Which type of fiber optic router is better

Article Overview

The best fiber optic routers are high-performance Wi-Fi 6 or Wi-Fi 7 models like the Netgear Nighthawk RS700S, ASUS ROG GT-AXE16000, and TP-Link Archer AX55, chosen based on speed, coverage, and device capacity.

Top Recommendations

1. Netgear Nighthawk RS700S (Wi-Fi 7) This router is ideal for multi-gig fiber plans and large homes, supporting up to 200 devices across 3,500 sq. ft. It features a 2.6 GHz quad-core CPU, 2 GB RAM, 10G LAN/WAN ports, and four 1G LAN ports. It also supports LAN aggregation for speeds up to 2 Gbps, making it perfect for gaming, streaming, and AR/VR applications . 2. ASUS ROG GT-AXE16000 (Wi-Fi 6E) Designed for gamers and high-demand users, this quad-band router delivers up to 16,000 Mbps throughput, excellent coverage, and ultra-low latency. It includes two 10G ports and handles multiple devices efficiently, making it suitable for AT&T Fiber or other ultra-fast connections . 3. TP-Link Archer AX55 (Wi-Fi 6) A budget-friendly option that still provides reliable performance for smaller homes. It supports high-speed Wi-Fi 6, offers good coverage, and is suitable for households that need stable connectivity without premium pricing . 4. NETGEAR Nighthawk RS90 (Wi-Fi 7) This router is compact, easy to set up, and delivers consistent speeds across multiple devices. It is ideal for families, remote workers, and streaming-heavy households, offering future-ready Wi-Fi 7 performance . 5. Mesh Systems (e.g., Linksys Velop AX4200) For whole-home coverage without dead zones, mesh routers are recommended. They distribute the signal evenly across large areas and multiple floors, ensuring stable connectivity for all devices
