

Which type of fiber optic router should I choose

Article Overview

For fiber internet, routers with Wi-Fi 6 or Wi-Fi 7, multi-gig WAN ports, and strong coverage are ideal, such as the Netgear Nighthawk RS700S or TP-Link Archer AX55.

Key Features to Look For

- Wi-Fi Standard: Wi-Fi 6 (802.11ax) or Wi-Fi 7 (802.11be) is recommended to fully utilize fiber speeds, especially for plans 1 Gbps and above .
- WAN Port Speed: Multi-gig WAN ports (2.5 Gbps or higher) are essential for high-speed fiber plans; a 1 Gbps port may limit your connection .
- Coverage: Choose a router that matches your home size. Mesh systems like Linksys Velop AX4200 are ideal for whole-home coverage without dead zones .
- Device Handling: Look for routers that support multiple devices simultaneously, using MU-MIMO and tri-band configurations to prevent congestion .
- Security Features: Built-in protection like Netgear Armor or AiProtection Pro can safeguard your network from malware and hackers .

Recommended Routers

- Netgear Nighthawk RS700S (Wi-Fi 7): Best overall for multi-gig fiber plans, supports up to 200 devices, ideal for gaming, streaming, and large homes .
- ASUS ROG GT-AXE16000: Designed for gamers, ultra-low latency, high throughput, and Wi-Fi 6E support .
- TP-Link Archer AX55: Budget-friendly Wi-Fi 6 router, reliable for smaller homes or...
